First in Oregon

Established in 2005, we are Southern Oregon's first fellowship-trained interventional pain management practice. We are well respected for our conservative and innovative treatment methods.

Founders of PSSO

Dr. Savino, board certification in Anesthesiology, with a sub-specialty in Pain Management.

Dr. Johnston, a board certification in Pain Medicine, with a sub-specialty in Pain Management.

Dr. Quave, board certification Physical Medicine and Rehabilitation with a sub-specialty in Pain Medicine.

Dr. Kim, board certification Physical Medicine and Rehabilitation with a sub-specialty in Pain Medicine.

On the forefront of innovation

We strive to be pioneers in the advancement of pain management techniques. We were the first in Oregon to perform the revolutionary mild® procedure (Minimally Invasive Lumbar Decompression), and continue to be informed and trained in new methods and technology.

Individualized treatment plans

We believe treatment cannot be standardized across diagnoses. We work with specialized practitioners to create a customized treatment plan that is most beneficial to your individual needs.

Multi-disciplinary approach

We are committed to treating the whole person. Using a multidisciplinary approach to pain management, we go beyond just medications. We incorporate lifestyle changes, non-invasive surgical procedures, physical therapy, education and other treatments

Locations: 825 Bennett Ave * 3555 Lear Way,
Medford, Oregon

Our Procedures

At Pain Specialists of Southern Oregon our procedures are done at our new, state of the art Ambulatory Surgery Center (Crater lake Surgery Center) located next to our office on Bennett Ave. Our ASC procedures are done at a fraction of the cost compared to Hospitals. This provides much better care and more affordable for all our patients.
